

Making Dentistry Easier.SM

2020 PRODUCT SHOWCASE

PERFECT
PREVENTION

ACCURATE
IMPRESSIONS

EFFICIENT
DELIVERY

**BEAUTIFUL
RESULTS**

Celebrating 50 Years

"Like most practicing dentists, I experienced problems with products that made the delivery of quality dentistry more difficult than it needed to be. My first products, AccuDose® tubes and the C-R® syringes changed the use of dental materials and made dentistry easier. 50 years later, I am proud that Centrix continues to introduce products and ideas that fulfill our mission."

Making Dentistry Easier.

~ Dr. William Dragan

MAKING DENTISTRY EASIER!

Today, Centrix manufactures and engineers hundreds of dental products focused primarily on general restorative and preventive dentistry, the heart and soul of most dental practices. As a leader in materials and delivery systems, Centrix continues to introduce inventive dental systems certain to become the new standard in dentistry.

OUR FIRST INNOVATIONS!

Mark IIIp™ Gun & Snap-Fit™ Gun

Easy, direct-to-prep delivery of today's dental materials. **Made in the USA and Used in every dental office!**

Benda® Brush Applicators

One-piece, bendable head, precision brushes. **Made in the USA. Can you imagine dentistry without them?**

AccuDose® & NeedleTube®

Direct-to-prep **done better!** Dispense exactly the material needed with no waste or cross-contamination. **Centrix Tubes & Plugs are made in the USA and truly changed the industry!**

OUR NEWEST INNOVATIONS!

NoCord™ VPS

Industry-First: Hemostasis and retraction built-in! Award-winning, one-step, self-retracting, impression material. Better marginal detail and better fluids control.

Encore® D/C + Connexio®

Making post-endo treatment easier and more assured. For restorations that last! Increased bond strengths reduce polymerization shrinkage, virtually eliminating micro-leakage.

PREVENTION FOR LIFE®

At Centrix, we believe in **Prevention for Life** — great preventive dentistry to maintain great oral health throughout your patients' lifetime.

The most effective caries prevention program is a combination of fluoride varnish plus patient awareness so patients of all ages take advantage of this effective treatment.¹

Our program is designed to help you deliver improved oral health to every patient, based on their individual needs. Our informational tools help the dental office identify and profitably treat ALL patients, at any age, according to their risk level — and not limited by their insurance reimbursement.

Prevention For Life Includes:

- **Patient Self-Assessment Forms**
- **CAMBRA Forms**
- **Practice Health Calculator**
- **Easy-to-use Prevention Products**

ORAL CARE AND PREVENTION

Centrix makes prevention easier for you and your patients

FluoroDose®

Award-Winning Fluoride Varnish with Xylitol

- Tastes Better! Feels Better! Better Priced!
- Application takes less than a minute.
- Unit-dose delivery means easier use, easier cleanup.

DENTAL ADVISOR TOP AWARD: **FLUORIDE VARNISH**

LoliCaine®

Topical Anesthetic | 20% Benzocaine Gel

- 4 Great flavors: Bubble Gum, Cherry, Mint, Piña Colada.
- Rapid onset with no alcohol aftertaste!
- 1-oz. jar priced competitively.
- Unit-dose LoliPack® saves time and reduces cross-contamination.
- The LoliPack is the perfect "take-home pack" for post-op discomfort.

NEW!

E-Lieve™

Vitamin E Treatment | Made in the USA

E-Lieve helps to relieve:

- Chapped lips before, during and after dental procedures.
- Dryness and irritation when using rubber dams.
- Sore tissue from deep scaling procedures.
- Discomfort from wearing new dentures.
- Irritation caused by orthodontic brackets.

A Faster, Easier Solution for Moisturizing and Soothing Minor Soft Tissue irritation.

Champ™

Pit & Fissure Sealant | Glass-Filled Acrylate Resin

- Single-step, brush-on application.
- No bonding agent required.
- Bioactive resin with antibacterial properties.
- Unique moisture-friendly chemistry tightly seals margins, eliminating pitting, chipping or staining.
- Made in the USA.

Exposé®

Caries Indicator on a Stick

- Easily identify and remove all infected dentin.
- Single-patient applicators make tray set-up easy.
- No syringe, no sheath, no tips to replace.
- No cross-contamination, no messy spills, no stains!
- Made in the USA.

IMPRESSIONING

Versatile choices for easier, safer impressions

UNIQUE AND COST-EFFECTIVE SOLUTIONS FOR ALL IMPRESSION TECHNIQUES

NoCord™ VPS

One-Step, Self-Retracting Impressioning System

- The safest, most unique VPS available today.
- Built-in hemostasis – wash stops bleeding and fluid flow for clear margins, and provides exceptional detail.
- MegaBody™ Tray Material creates sulcular expansion. Enables complete margin capture, usually without retraction cord. Adds extra hemostasis when you do use cord.

Made in the USA

Access GOLD®

- Low-viscosity wash material, syringes easily into sulcus and around prep.
- High-contrast color makes it easy to verify all margins have been captured.

Access MONOPHASE®

- Non-slumping, medium-body material.
- Perfect for edentulous impressions or as a tray material.

Access HEAVY®

- High-viscosity tray material, and the perfect complement to Access GOLD.
- Easy to place, easy to remove.

Access PUTTY®

- Non-oily and easy to mix.
- For use as a tray material or for easy fabrication of stents, matrices and more.

EASIER, FASTER BITE REGISTRATION

Access BLUE®

VPS Quick Bite Registration Material

- Mousse-like viscosity for easy, fast application.
- Sets hard, like laboratory plaster in just 30 seconds.
- Most accurate bite registration for intercuspal and centric relationships.
- Cut and trim the impression without it crumbling.
- Made in the USA.

3.n.One™

Impression Trays For Dual-Arch Technique

- Unique undercut ridges lock impression materials in place.
- High rigidity with non-tear, flexible webbing ensures maximum accuracy.
- Three different shapes to meet all applications.

BETTER RETRACTION WHEN YOU NEED IT

Access® Edge

High-Viscosity Kaolin Clay with 15% Aluminum Chloride*

- A thicker, more viscous paste that provides more 'push' of the soft tissue.
- Uses standard composite syringe; no glass vials.
- Dual action – stops bleeding, and absorbs moisture.
- Made in the USA.

*GingiCap™ Compression Caps included

Two Kaolin Clay formulations to meet every need!

AccessFLO®

Low Viscosity Kaolin Clay with 15% Aluminum Chloride*

- Flowable paste that more easily penetrates the sulcus.
- Dual action – 15% aluminum chloride plus kaolin clay stops bleeding and absorbs moisture.
- Made in the USA.

GingiTrac™

VPS Gingival Retraction System*

- Makes digital dentistry easier and better.
- Unique VPS material gently retracts tissue yet removes cleanly with no debris or particles that can distort digital images.
- Ammonium aluminum sulfate to control bleeding and oozing.
- Made in the USA.

POST-ENDO TREATMENT

Centrix products provide a superior approach

ROOT CANAL TREATMENT

Calciject®

Calcium Hydroxide Paste for Root Canal Therapy

- No messy mixing of powder and liquid.
- Direct injection from package to mouth.
- Single-dose tips for maximum asepsis.
- Bendable 20 ga NeedleTube® tips for easy canal access.
- Superior results compared to spiral paste fillers.
- Bacteriostatic and radiopaque.
- Made in the USA.

THE DENTAL
ADVISOR
++++½

Connexio®

Dual-Cure, Self-Etch Bond for Core Buildups

- Designed for the demands of deep core build-ups where light cannot reach.
- Dual-cure adhesive system provides the highest possible bond strength.*
- Nanoparticle reinforced.
- Water solvent (not acetone or ethyl alcohol); makes Connexio more tolerant of humid canal conditions than other adhesives.

*Migliau, G; Piccoli, L; Di Carto, et al, Comparison between three glass fiber post cementation techniques. (Ann. Stomatol (Roma); 2017 Jan-Mar: 8(1): 29-33. Published online 2017 Jul 3 doi [10.11138 ads/2017.8.1.029].

DUAL – CURE BUILDUPS THAT BOND

More dentists choose **Encore D/C** and **Connexio** for a bond that can't be broken!

Encore® D/C MiniMix®

Dual-Cure, Core Buildup Composite

- Non-slumping formula stays where it's placed, will not run and does not require a matrix or core form.
- Exclusive MiniMix® cartridge (0.5 mL) controls costs while eliminating waste and cross-contamination.
- Cuts like dentin to reduce ditching.
- NeedleTube® mixing tip delivers material to bottom of the post hole.
- Made in the USA.
- **Also available in traditional 25 mL cartridges.**

ESSENTIAL TOOLS FOR STRUCTURAL RESTORATIVE INTEGRITY

NEW
FORMULA!

AbsolLute™

Universal Resin Cement

- Self-etch, self-adhesive, dual-cure for faster, easier placement. No primer or conditioner needed.
- Definitive cementation that lasts.
- Designed especially for feldspathic, high leucite, lithium disilicate, alumina and zirconia materials.
- Made in the USA.

3 Shades = A natural-looking restoration

- **Translucent:** Provides a natural esthetic
- **Opaque (White):** Completely blocks underlying colors/show-through
- **Universal (Opaque Tooth Shade):** Completely blocks underlying colors/show-through

Onyx™

40% Phosphoric Acid Etching Gel

- Highest strength, most effective etchant.
- Black silicon carbide particles provide superior contrast.
- Better control and easier placement.
- Stays where placed, will not run.
- Particles can be agitated on tooth to mechanically scrub and clean the surface.
- No dye, does not stain, rinses completely.
- Made in the USA.

TEMPORIZATION

Complete solutions designed to work better together

THE RIGHT FILL MATERIAL FOR ALL YOUR NEEDS

Tempit®

Moisture-Activated Temporary Filling and Sealing Material

- Calcium sulfate and zinc oxide.
- Ideal for sealing endo access openings and for short term temporary fillings.
- Moisture-activated, sets in 5 minutes.
- Expands slightly when set, seals out micro-leakage and bacterial ingress.

Tempit® L/C

Light-Activated, Flexible Resin Temporary Restorative Material

- Light curing, single-component composite resin for temporary restorations.
- Sets firm, yet flexible.
- Easily removed with an explorer without damaging the margins.
- Perfect for indirect restorations, inlays/onlays.
- Seals implant screw access openings.
- Covers sharp orthodontic brackets.

Tempit® Ultra-F

Light-Activated, Rigid Intermediate Restorative Material with Fluoride

- Micro-filled polymer resin.
- Rigid, harder-wearing material for longer-term temporaries.
- High compressive strength for bruxism patients.
- Ideal for tooth-colored restorations in deciduous teeth.
- Non-eugenol formula with fluoride release.
- **Tempit Ultra: without fluoride.**

SUPERIOR BUILD MATERIAL

Access®

Automix Temporary Cement

- Perfect for longer-term temporary use.
- Low film thickness.
- Flows and places easily.
- Semi-elastic set.
- Safe, easy adhesive.
- Calcium hydroxide provides bacteriostatic effect on mold.
- Eugenol-free, won't interfere with bonding agents or other resin materials.

NoMIX®

Short-term, Hard-setting, Temporary Cement

- Easy to use, dispense, clean and remove from prep.
- Low film thickness, harder set.
- Tube applicators are ideal for both chair-side application and for patient take-home.
- Expands slightly upon setting for a tight margin seal.
- Moisture activated, no need to dry.
- **Also available in syringe delivery for chair-side application.**

SUPERIOR BUILD MATERIAL

Access Crown®

Temporary Crown & Bridge Material

- **More:** shades (7), speed, strength and savings.
- Ideal handling characteristics: reaches elastic state and ready to remove from mouth in less than 60 seconds.
- Low shrinkage, low heat generation.
- High compressive, flexural strength.
- Highly aesthetic – polishes easily, beautifully.

Natural Esthetics,
High Fluorescence,
Superior Function.

DELIVERY SYSTEMS

Control costs and eliminate cross-contamination

APPLY MATERIALS EASILY AND MORE PRECISELY

Benda® Brush

The Original Precision Disposable Brush Applicator

- When you need to apply more than a drop.
- Bend head to any angle with no bounce-back!
- Unique non absorbing fibers have a greater carrying capacity, ensuring better spreading.
- Regular point for large applications.
- Mini point for smaller spaces.
- Made in the USA.

Benda® Micro

Precision Disposable Brush Applicator

- Perfect for when you need only a drop.
- Regular point (2.0 mm).
- Fine point (1.5 mm).
- Extra Fine point (1.0 mm).
- Non-linting design will not leave fibers behind in restorations or sulcuses.
- Made in the USA.

Benda® Twin

Double-ended, Twin-style Applicator

- When you are using more than one material.
- Ideal for 2-step procedures.
- Extended reach.
- Made in the USA.

Benda Brush

Benda Micro

Benda Twin with snap-apart handle!

More sizes, more styles and more colors means the right applicator for every material and every need!

DELIVER MATERIALS MORE EFFECTIVELY

More Usable Material Per Cartridge!

Mixer Waste (g)
 Usable Material (g)

Less waste in every tip!

SuperMixer™

AutoMix Mixing Tips

- High-efficiency mixer, up to 38% reduced material waste.
- Up to 50% more units from every cartridge.
- More consistent mixing of any material.
- Color-coded hub for easy replacement of old-style tips.
- Replaces any 1:1 mixing tip – same color for same color.

AccuDose® & NeedleTube®

Delivery Systems

- Dispense exactly the material needed.
- Prevent cross-contamination.
- Ready to use, place directly to the prep.
- No waste, no contamination.
- Compatible with all C-R Syringes and guns.
- Made in the USA.

PREVENTION
